KIA ORA

Choosing what comes next can feel exciting, daunting and full of pressure — but it's also full of possibility. We believe education should open doors, build confidence and lead somewhere meaningful. That's why our learning is grounded in the real world: practical, hands-on and shaped by industry, so you graduate ready to step into work, further study or whatever future you're aiming for.

More than a qualification, study is about finding people who support you, discovering what you're capable of and building a life that feels right for you. With flexible study options, supportive tutors and a welcoming community, we give you the space to learn in a way that suits you and a place to achieve success, your way.

WHY CHOOSE ARA?

1.

Smaller classes make a big difference

2.

You'll learn from people who've done the job themselves

3.

Industry experience is part of the learning experience

4.

Our facilities reflect modern workplaces

5.

Academic, learning & wellbeing support are always available

6.

Flexible pathways give you options

7.

Our qualifications are recognised around the world

8.

You'll graduate skilled, confident and prepared for what's next

What 'Ara' means

Ara is the Māori word for path or journey. It represents the learning process, the many pathways to success, and the routes and rivers that criss-cross the Canterbury Plains from the mountains to the sea.

The phrase *'Ara rau, taumata rau'* translates to *'many pathways, many opportunities'*.

EVERYTHING YOU NEED TO SUCCEED.

Feel supported, every step

Support available includes:

- Learning and study support
- Disability and accessibility services
- Health and wellbeing services
- Counselling and advocacy
- Māori and Pacific student support
- International student support
- Career and study guidance

Learn, connect and belong

Campus life includes:

- Libraries and study spaces
- Sport and recreation facilities
- Student clubs and interest groups
- Student events and activities
- On-campus cafés
- Student accommodation

Access funding for your studies

Funding options include:

- Scholarships
- Student loans and allowances
- Financial hardship assistance
- Youth Guarantee funding
- Māori and Pacific training initiatives
- Support through StudyLink and Work and Income

Scan to view maps of each campus on our website.

YOUTH GUARANTEE

If you're 16-24 years old and not at school or working, a Youth Guarantee programme is the smart way to get ahead. These free programmes set you up with great foundation skills for employment or further study, and enable you to make confident decisions about your future.

As a Youth Guarantee student you'll get:

- an orientation programme which includes how to access financial assistance
- transport support
- extra pastoral care
- specific cultural and learning support that's easy to access
- career planning and advice
- regular activities with other Youth Guarantee students
- access to counselling services
- guidance as you transition into work or further tertiary study

Please note: places are limited on these courses and funding may be exhausted throughout the year. If you already have a Level 1 or 2 qualification, we may refer you to a Level 3 study option. We encourage you to apply early to secure your place.

MĀORI AND PACIFIC TRADES TRAINING

If you're Māori or Pacific and aged between 16 and 40, Māori and Pacific Trades Training can help you gain valuable skills for employment and set you on a pathway to a rewarding career in the trades. These programmes are free and combine practical training, cultural support and personalised guidance to help you succeed in study, employment and beyond.

As a Māori and Pacific Trades Training student you'll get:

- support from dedicated tutors, student advisors and mentors
- a learning environment that values whānau, community and cultural strengths
- opportunities to strengthen your cultural identity in a supportive learning environment
- connections with industry, employers and apprenticeship opportunities
- help to build confidence, workplace skills and career readiness
- guidance into a study pathway that matches your goals and aspirations
- ongoing support as you move into employment, an apprenticeship or further study

Please note: places are limited and programme availability may vary throughout the year. We encourage you to apply early to secure your place and discuss the training options that best suit your goals.

TRADES PRIMER

If you're interested in a trades career but not sure which trade to choose, our Trades Primer course is an excellent way to sample different trades, discover your strengths and find your future direction.

Trades Primer is a Youth Guarantee course and free to eligible applicants, depending on funding availability (please see conditions opposite).

Would this suit me?

A career in trades could suit you if you enjoy practical work, using tools and seeing a clear result from your effort. It helps to be reliable, safety-conscious and willing to keep learning. Depending on your chosen trade, you may work indoors or outdoors, independently or as part of a team.

WHICH trades will I sample?

- **Construction trades** - carpentry, joinery and painting
- **Automotive trades** - auto engineering and autobody
- **Engineering trades** - manufacturing and fabrication
- **Infrastructure trades** - plumbing, gasfitting, drainlaying and electrical

WHAT will I learn?

- Essential skills in a range of trades
- Literacy, numeracy and digital skills
- Practical problem-solving and critical thinking
- Time management, resilience and self-management
- Communication, teamwork and workplace interactions
- Career planning and future pathway exploration
- Goal setting, personal development and building confidence

After completing the programme, you'll be better prepared for: further training in a specific trade; an apprenticeship; entry-level trade assistant roles; labouring positions.

Trades Primer	LEVEL	LOCATION	DURATION	INTAKES
	2	Christchurch, Timaru*	Full-time 6 months	February [^] , July

*Only carpentry, auto engineering, electrical and mechanical trades are covered in Timaru.
[^]Christchurch only

CARPENTRY

Carpentry is a key building trade focused on constructing, repairing and altering buildings, especially homes. Carpenters read drawings and specifications, measure and cut materials, assemble frames, install cladding, joinery and roofing, and complete interior linings, trim and hardware. Work is carried out on building sites and in workshops, using hand and power tools and coordinating with other trades. Safe

work practices, accuracy and meeting timeframes are essential. All work must meet the New Zealand Building Code, and many carpenters progress towards becoming a Licensed Building Practitioner (LBP).

Would this suit me?

Carpentry suits people who like practical work and want to see results at the end of the day. You'll do well if you're reliable, safety-minded and proud of doing a tidy job. An eye for detail, basic maths skills and steady hands help, along with enjoying teamwork and working outdoors in all conditions.

Career Pathways

Entry Level

- Carpentry apprentice
- Construction labourer
- Hammer hand
- Pre-nail worker
- Building site assistant

Intermediate

- Qualified carpenter
- Residential builder
- Commercial carpenter
- Renovation carpenter
- Formwork carpenter
- Interior fit-out installer

Advanced

- Leading hand
- Foreman
- Site supervisor
- Project manager
- Licensed building practitioner (LBP)
- Business owner

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

- Tools, materials and construction methods
- Drawings, specifications and calculations
- Site set-out and preparation
- Concrete and timber substructures and floors
- Wall framing, beams and roof structures
- Weathertight cladding, joinery and roofing
- Interior linings, insulation, trim and hardware
- Workplace safety and site requirements

HOW will I learn?

- Hands-on workshops in trade facilities
- Practical projects in simulated building spaces
- Classroom sessions for theory and planning
- Online and blended learning support
- Workplace learning on real building sites
- Tutor visits, assessment and feedback in context

Industry connections

Whether you study on campus or through an apprenticeship, you'll learn with strong links to the construction industry. Our tutors are industry-qualified builders with extensive experience and strong connections to Registered Master Builders and other industry organisations. On campus, you'll build

a house from start to finish on site, giving you real-world experience across the full build process. As an apprentice, you'll earn while you learn – working for an employer, learning on the job and completing part-time study at Ara.

Study options

	LEVEL	LOCATION	DURATION	INTAKES
New Zealand Certificate in Construction Trade Skills (Carpentry)	3	Christchurch, Timaru	Full-time 1 year	February, May [^] , August [^]
New Zealand Certificate in Carpentry (Apprenticeship)*	4	On-the-job, South Island-wide	Part-time 4 years	All year

* Flexible study arrangements mean you can undertake your apprenticeship anywhere in the South Island and only need to attend an in-person class once a month in Christchurch. Ara staff will visit your workplace at regular intervals to assess your progress.

[^]Christchurch only

Starter options

Starter courses can help you meet the academic entry requirements for higher-level programmes.

Trades Primer*	LEVEL	LOCATION	DURATION	INTAKES
	2	Christchurch, Timaru	Full-time 6 months	February [^] , July

Please note: Some higher-level programmes have additional entry/selection criteria. See our website for full details.

*Available free through Youth Guarantee. Conditions apply.

JOINERY

Joinery is the work of designing, making, assembling and installing timber and composite products for homes and commercial spaces. Joiners produce items such as cabinetry, kitchens, doors and windows, stairs, benchtops and custom furniture. The job blends practical skill with precision, using measurements,

drawings and specifications to achieve a quality finish. Work may happen in a workshop, on-site during installation, or across both, often alongside other trades, suppliers and clients to meet timeframes and requirements.

Would this suit me?

This area suits people who like making things and take pride in accuracy. You might enjoy hands-on work, using tools and machinery, and following plans to create a finished product. Patience, problem solving, steady focus, reliability and good teamwork help, along with a strong safety mindset and a willingness to keep building your skills.

Career Pathways

Entry Level

- Joinery labourer
- Workshop assistant
- Joinery apprentice
- Production assistant
- Machinery operator

Intermediate

- Qualified joiner
- Cabinetmaker
- Cabinetry installer
- Shopfitter
- Stair builder

Advanced

- Workshop supervisor
- Joinery project manager
- Production manager
- Technical representative
- CNC programmer
- Business owner

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

- Timber, board and composite materials
- Hand tools and power tools
- Measurements, calculations and set-outs
- Reading drawings and job specifications
- Machinery set-up and basic maintenance
- Joinery manufacturing, assembly and installation
- Job planning, scheduling and costings
- Workplace health and safety practices

HOW will I learn?

- Hands-on projects in workshop settings
- Demonstrations and supervised practice
- Industry-standard tools and machinery use
- Work-based projects and evidence portfolios
- Tutor support, site visits and check-ins
- Online resources to support theory learning

Industry connections

Whether you study on campus or through an apprenticeship, you'll learn with strong links to the construction industry. On campus, you'll learn from tutors who are Certified Builders and members of Registered Master Builders and other industry groups. You'll work on projects with real deadlines and clear quality expectations, so you're better prepared for

the pace and standards of the workplace. You'll also connect with industry groups such as the National Kitchen Bathroom Association and take part in visits to suppliers. As an apprentice, you'll earn while you learn - working for an employer, learning on the job and completing part-time study at Ara.

Study options

	LEVEL	LOCATION	DURATION	INTAKES	NOTES
New Zealand Certificate in Construction Trade Skills (Joinery)	3	Christchurch	Full-time 30 weeks	February, May	
New Zealand Certificate in Joinery (Apprenticeship)*	4	On the job in Canterbury, Marlborough or the West Coast	Part-time 2.5 to 4 years, depending on your chosen specialisation	All year^	Available in: • Timber Stairs • Cabinetry • Craftsperson • Laminate Fabrication • Timber, Doors and Windows

**Complete your apprenticeship anywhere in Canterbury, the West Coast or Marlborough. Christchurch learners attend weekly classes, while learners outside Christchurch study by distance with tutor support and attend one annual one-week block course in Christchurch. Ara staff will visit your workplace at regular intervals to assess your progress.*
^One night class a week and one block course a year

PAINTING & DECORATING

Painting and decorating is the trade that gives buildings their final polish and long-term protection. Work spans new builds, renovations and maintenance across homes and commercial sites. Painters and decorators measure up, read plans and specifications, and choose products that suit the surface and conditions.

They then prepare surfaces and apply paints, finishes and wall coverings so spaces look good and stand up to daily wear. Painters and decorators are responsible for safe and tidy work practices and often coordinate with other trades on busy sites.

Would this suit me?

This area suits people who like practical work and want to see results. You may enjoy working with your hands, taking pride in neat finishes and following instructions. It helps to be reliable and patient, with an eye for colour, texture and detail. The work can be physically demanding, so good fitness is important.

Career Pathways

Entry Level

- Painting assistant
- Apprentice painter
- Site labourer
- Paint shop assistant
- Trainee wall coverer

Intermediate

- Painter and decorator
- Spray painter
- Wallpaper installer
- Colour consultant
- Team leader
- Paint company sales rep

Advanced

- Foreperson/supervisor
- Business owner
- Contracts manager
- Estimator
- Project manager
- Trade trainer

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

- Trade calculations and measurements
- Reading plans and specifications
- Tools, equipment and materials
- Surface preparation and repair
- Paint and coating application
- Spray application basics
- Teamwork and workplace communication
- Workplace health and safety

HOW will I learn?

- Hands-on practical workshops
- Tutor demonstrations and guided practice
- Interior and exterior project work
- Online and self-directed study tasks

Industry connections

You'll build links with industry through real projects, work experience opportunities and input from people working in the trade. Guest speakers share what's happening on sites and what employers look for.

Where available, project briefs may come from community clients. Industry connections can include Resene and Dulux, helping you understand expectations and pathways into work.

Study options

ELECTRICAL TRADES

Electrical trades professionals install, maintain and repair the systems that power homes, workplaces, industry and infrastructure. Their work ranges from wiring new builds to upgrading switchboards, connecting motors, setting up lighting and control circuits, and finding faults when things stop working.

Professionals in this field read plans, measure and mark out runs, select the right cables and fittings, and test their work to confirm it's safe. They often work on-site, sometimes in tight spaces, and need to stay focused and organised.

Would this suit me?

This area could suit you if you like practical work and enjoy how things operate and connect. You might be science minded, methodical, and keen to solve problems step by step. It helps to take safety seriously, follow rules, and take pride in doing a tidy job. Reliability and good communication are important too.

Career Pathways

Entry Level	Intermediate	Advanced
• Electrical apprentice • Electrical trade assistant • Electrical labourer • Electrical storeperson • Data cabling trainee	• Registered electrician • Fire alarm technician • Security systems technician • Data communications technician • Industrial electrician • Lines technician	• Electrical supervisor • Site foreman • Electrical project manager • Electrical inspector • Automation specialist • Electrical business owner

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

- Electrical workplace safety, first aid and ethics
- Direct current (DC) circuit fundamentals
- Alternating current (AC), magnetism and isolation
- Tools, test instruments and safe work practices
- Cables, fittings, testing and fault finding
- Supply systems, earthing and bonding
- Electrical drawings, protection and switching circuits
- Installations, motors and transformers

HOW will I learn?

- Practical workshops and wiring simulations
- Hands-on use of tools and test equipment
- Lectures, tutorials and small-group learning
- Teamwork on applied projects and tasks
- Practical and written assessments and tests
- Closed-book capstone examination

Industry connections

You'll learn with input from industry guest speakers and visits to electrical workplaces, giving a clearer view of day-to-day work across different parts of the trade. Learning is shaped by industry expectations and aligned with current safety, compliance and professional standards, ensuring that the skills you build transfer well into apprenticeships and entry-level roles.

Study options

	LEVEL	LOCATION	DURATION	INTAKES
New Zealand Certificate in Electrical (Pre-Trade)	3	Christchurch, Timaru	Full-time 1 year	Various
New Zealand Diploma in Engineering (Electrical)	6	Christchurch	Full-time 2 years Part-time up to 5 years	February

PLUMBING, GASFITTING & DRAINLAYING

Plumbing, gasfitting and drainlaying is about protecting health, safety and property through well-built water, gas and drainage systems. Tradespeople install, service and repair pipework, fixtures and appliances, and build drainage that moves stormwater and wastewater where it needs to go. They read plans, take measurements, do basic calculations and choose materials suited to each job.

The work is practical and varied, often on active sites or in occupied buildings. Because mistakes can be serious, the job demands safe work practices and compliance with legal and ethical requirements.

Would this suit me?

If you like hands-on work, practical problem solving and using tools, this area could be a good fit. You'll need patience, a positive attitude and the ability to follow instructions carefully. Taking pride in doing a job well, communicating clearly and working well with others will also help you succeed.

Career Pathways

Entry Level

- Plumbing apprentice
- Gasfitting apprentice
- Drainlaying apprentice
- Trade assistant
- Maintenance assistant

Intermediate

- Plumber
- Gasfitter
- Drainlayer
- Maintenance plumber
- Service technician

Advanced

- Senior plumber
- Drainage supervisor
- Gas safety supervisor
- Site supervisor
- Business owner

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

- Tools selection, use and maintenance
- Simple drawings and sheet metal patterns
- Trade calculations for common tasks
- Excavation, trenching and backfilling basics
- Water basics, pipework and sanitation fundamentals
- Essential safety skills and first aid
- Confined space entry and asbestos safety
- Regulatory, legal and ethical requirements

HOW will I learn?

- Hands-on practical workshops and tutor demonstrations
- Tutorials and short lectures to build theory
- Simulation exercises and role plays for safe practice
- Projects and applied tasks in pairs or small groups
- Independent study

Industry connections

Industry helps shape what you learn, with regular input from local employers and business owners. You'll work on practical tasks that reflect everyday plumbing, gasfitting and drainlaying jobs, often in pairs or small

teams. Work and education visits can add extra real-world context. You'll also be encouraged to organise your own work experience to build contacts and improve job prospects.

Study options

	LEVEL	LOCATION	DURATION	INTAKES	NOTES

AUTOMOTIVE TRADES

Automotive trades cover the practical and technical work that keeps vehicles – everything from cars and motorbikes to trucks and heavy machinery – operating safely. Tradespeople inspect vehicles, identify faults, repair or replace components and check performance before the vehicle returns to the road. Work may involve mechanical systems like engines, braking and steering, as well as electrical and electronic systems

that are now a major part of the job. Collision repair is another pathway, involving removal and refitting of components and completing minor repairs before refinishing. The work is practical, methodical and guided by workplace procedures, safety standards and manufacturer instructions.

Would this suit me?

Automotive trades may suit you if you like tools, technology and seeing a job done properly. It's a good fit you're practical, methodical and you enjoy solving problems. You also need to be able to work within a team, follow safety rules and keep learning as vehicles and technology changes.

Career Pathways

Entry Level

- Automotive apprentice
- Workshop assistant
- Parts assistant
- Trainee service technician
- Collision repair remover and refitter
- Refinishing preparer

Intermediate

- Automotive technician
- Diagnostic technician
- Collision repair technician
- Automotive refinisher
- Service advisor
- Parts interpreter

Advanced

- Senior technician
- Workshop supervisor
- Service manager
- Structural repair technician
- Refinishing specialist
- Workshop owner

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

Automotive Engineering

- Workshop safety, policies and regulations
- Hand tools, power tools and equipment use
- Engine servicing fundamentals
- Electrical and electronic fault-finding basics
- Driveline, brakes and brake adjustments
- Steering, suspension, wheels and tyres
- Component removal, refitting and storage
- Minor repairs and surface preparation basics

Collision Repair

- Safe workshop practices and procedures
- Collision repair tools and equipment
- Minor vehicle damage assessment
- Repair procedures and materials
- Vehicle component removal and refitting
- Interior, exterior and critical components
- Workplace communication and teamwork
- Supervised collision repair work experience

HOW will I learn?

- Hands-on tasks in workshop environments
- Tutor demonstrations and supervised practice
- Simulated workplace jobs and practical projects
- Online activities to support theory learning
- For collision repair, supervised work experience (50 hours)

Industry connections

You'll build job-ready skills through hands-on learning that reflects current workplace practice and manufacturer requirements. Industry bodies such as Motor Industry Training Organisation (MITO), Hanga-Aro-Rau and the Collision Repair Association

help inform the direction of training. For collision repair, you'll do 50 hours of supervised work experience with a partner business, supported by onsite visits and learning-focused feedback.

Study options

ENGINEERING TRADES

Engineering trades cover the practical work that keeps industry running, from making parts and structures to building, fitting and maintaining machines and equipment. Tradespeople make, install and repair items like structural steel beams, stairs and balustrades, ducting, tanks, pipework, custom trailers, machine guarding and plant equipment.

People in this field read drawings, measure and mark out accurately, choose suitable materials, then cut, shape, join and assemble components to meet job requirements. Work can range from light fabrication through to heavy engineering and structural steel, as well as machining and maintenance.

Would this suit me?

This area could suit you if you like hands-on work and making things accurately. It helps to enjoy practical problem solving, working to a plan and thinking step by step. You'll need a steady approach, good focus and the kind of mindset that checks measurements twice.

Career Pathways

Entry Level

- Trade assistant
- Industrial process worker
- Machine operator
- Junior welder
- Apprentice

Intermediate

- Welder
- Fabricator
- Mechanical fitter
- Machinist
- Maintenance technician
- Structural steelworker
- Toolmaker

Advanced

- Leading hand
- Workshop supervisor
- Quality inspector
- Maintenance planner
- Project supervisor
- Business owner

NB: Advanced roles may require experience and/or further study.

WHAT will I learn?

- Health and safety practices
- Engineering calculations and measurement
- Reading and creating basic drawings
- Materials, fasteners and handling methods
- Machining and workshop processes
- Fabrication principles and techniques
- Welding and thermal cutting fundamentals
- Quality checks and efficient work practices

*May vary depending on the specialisation you choose.

HOW will I learn?

- Hands-on workshop practice
- Tutor-led demonstrations and guidance
- Learning by doing real trade tasks
- Tutor feedback as you practise
- Projects you can show employers
- Online and classroom learning support

Industry connections

Learning takes place in industry-standard workshops, using tools and equipment you'll see on the job. Projects are shaped with industry input and designed around real trade tasks, to ensure the skills you learn are relevant to local employers. Guest speakers and visits to workplaces help you understand day-to-day realities

and build connections. Depending on your course, you may have work-based learning opportunities. If you choose an apprenticeship study option, you'll complete much of your learning on the job, supported by block courses at Ara and tutor visits.
